Re: Brandt Design Group, Inc.

To whom it may concern:

This letter is written in recommendation for Deborah Brandt and Brandt Design Group, Inc.

I would highly recommend Brandt Design Group for all of your interior design needs. I have worked closely with Deborah and her team during the design and construction of Dignity Health Marian Regional Medical Center in Santa Maria, CA – a new 235,000 sf patient tower. Deborah was key to the successful design of the new patient tower which included 3 floors of new patient rooms, ICU/CCU, Women's Center, NICU, a new first floor lobby, Gift Shop, Emergency Department, Kitchen/Dining Room and a fabulous new Chapel. Her scope of work included interior design, lighting, furniture, artwork, donor walls and signage. She coordinates and stays on top of all of the details. As I client I really appreciate her thoroughness.

I found Deborah to be a highly talented professional who was very responsive to our needs and to the needs of the entire project team. Her work incorporates the vision we have as a provider of the highest level of care while being warm and inviting to our guests.

Through all phases of the construction process, the level of effort and the attention to detail that was provided by Brandt Design Group helped the entire project team accomplish the project outcomes in a professional and cost effective manner.

Deborah is a talented designer whose artistic sense, practical experience and professionalism would add value to your project and I would recommend her and Brandt Design Group without reservation.

Sincerely,

Ed Lindsay
