RE: Brandt Design Group

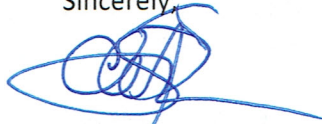

To whom it may concern:

It is with great pleasure that I recommend Brandt Design Group for any of your interior design service's needs. I have worked very close with Deborah Brandt and her team at the Brandt Design Group since 2005. Her team was specifically chosen and was hired to provide Interiors and Finishes design services for the New Pavilion Tower project at Sequoia Hospital located in Redwood City, CA. This project includes a new 4 story tower with 104 patient rooms, new dining room, and remodel of an existing hospital spaces that included a new main lobby, administration department, patient registration, conference rooms and a remodeled kitchen.

Deborah and her team skillfully balanced Sequoia Hospital and Dignity Health's expectations and needs with the practical issues of budget, timelines all the while working closely with the Owners Representatives, Project Management and Architectural teams. Her design work is absolutely spot on – reflecting a very enticing and healing environment for our Staff, Patients and their families, and our visitors. The color palette is warm, healing and inviting. Furniture is durable but beautiful and very well coordinated with the rest of the interior finishes/materials/artwork.

Deborah and her team listened intently to Sequoia's Leadership, Project Management and Clinical Staff. Deborah and her team very carefully captured the desires and tastes from those conversations with the stakeholders involved and then created a healing environment and finish standard that will stand the test of time. In my opinion Deborah and her team bring a wonderful artistic intelligence, practical experience and professionalism that would add value to your project. I would highly recommend her without reservation for any interior design services need.

Sincerely,

Chuck Sierer
