To whom it may concern:

I can without hesitation recommend Deborah Brandt Design Group for all of your interior design needs. I have worked closely with Deborah and her team for the past three years during the design of our new hospital and most recently the additional second patient tower which includes a twenty two bed pediatric unit. We designed the interior of the hospital to reflect a healing environment for our patients and their families. The color pallet is warm and comforting. The furniture is durable, beautiful and very coordinated with the fabrics, wall coverings and paints and artwork that were selected for our hospital. Our hospital has won many awards for its beauty in not only the architectural elements but also the interior design. Our newly opened Pediatric unit is the most spectacular unit I have ever seen with unique colors that are fun and alive yet reflecting the healthy and healing environment that our hospital promotes.

Deborah and her team listen intently to their clients. They are very careful to capture the desires and tastes of everyone involved. The end product speaks for itself. We have the most beautiful hospital within all of Arizona! You can see it for yourself on our website: www.MercyGilbert.org.

Sincerely,

President & CEO
Mercy Gilbert Medical Center
